[Caffeinated Soaps](#)

Tired of waking up and having to wait while brewing your morning java jolt? Does the phases “rise and shine” make you want to crawl back into bed? Well, get energized! Our pure, highly caffeinated soaps come in two versions, both packing a whooping 600 mgs. of pure caffeine anhydrous, (almost enough to wake the living dead). These soaps will have you bolting out of bed to jump start your day right in the shower!

Nature's Rx: The topical, transdermal application of caffeine has natural antibacterial and antidepressant properties. New studies also claim that caffeine has exceptional skin rejuvenating properties, along with helping flush away that excess cellulite. Does this get any better!!!

NOTE: Caffeinated soaps should not be used by children, elderly, pregnant women, people with caffeine allergies, heart conditions, or sensitive skin. Test a small amount on your inner arm before jumping into the shower full blast!
