After a long day at the beach, we always look forward to a seat at the local seaside *taverna*, along with a plate of assorted *mezethakia* and a glass of iced *ouzo*. One sip and you can feel that aromatic anise flavored liquid, slowly warm your body, as your senses surrender to the surrounding beauty. Time seems to stand still as you glance around to view the irresistible pull of the natural beauty of this region, as a counterpart to its ancient cultural riches and civilization.

I'm sure Plato would agree this is the perfect Greek Rx to the rigors and stress of modern daily life. *Steen Eyea Sou!*
