Our own special blend of nature's bounties has it all; fresh creamy goat's milk, wild thyme honey, colloidal oatmeal and sweet almonds. This formidable feast for the senses is considered by many as the ultimate soap, based on its natural nourishing and conditioning abilities and deliciously comforting aromatherapeutic properties.

Nature's Rx: Goat's milk is a rejuvenating emollient, high in protein and the only milk containing capric-capryllic triglyceride. It contains vitamins A, B6, B12 and E, as well as beta-casein, which help to hydrate and nourish dry skin. Honey has been used since antiquity as a natural skin softener and a potent antioxidant; it contains propolis, vitamins, enzymes and trace minerals. Oatmeal soothes and helps maintain skin barrier integrity, preventing water loss thus increasing moisture retention. Almonds, ground finely, gently

exfoliate the skin leaving it nourished with the therapeutic value rich in amino acids derived from its sweet, cold-pressed oil.
