In simpler times with simpler solutions, a sip of warm chamomile tea laced with honey seemed to cure-all. Nature's own Rx has always relied on the powerful antioxidant compounds of her time-honored plant essences, using them in different combinations for their exceptional medicinal properties.

**Nature's Rx:** Chamomile is one of the oldest and gentlest aromatherapeutic essential oils and for centuries has been used to soothe and calm irritated skin. Honey is a natural skin softener and a potent antioxidant that is revered for its ability to nourish and protect delicate skin. Lavender essence is known for generating relaxation, as well as preventing the build up of excess sebum, an oil that harbors bacteria on the skin.

**Note:** This soothing tea soap was inspired by Todd & Holland Tea Merchant's "Lavender Soleil" tisane tea.

The perfect bath*thyme* ritual. Sip a cup of their tea to soothe your insides, while using a bar of our soap to soothe your outsides. Tres bein. [www.todd-holland.com](http://www.todd-holland.com)
