On an early morning walk along the Mediterranean seaside, the cool wet sand feels sensually invigorating, while gently massaging the *souls* of your feet. Rhythmically and repeatedly, a fine salty mist, sprays and covers your whole body with the aroma of the sea and her underwater gardens. Truly, only Nature could perfected this therapeutic combination of *Massage*, *Hydro*, and *Aroma* therapy.

**Nature's Rx:** This beautiful H2O fragranced soap is infused with a brine solution made from Mediterranean Sea salt, high in natural trace elements, minerals and vitamins. It is rich in potassium, known for its astringent restorative properties to the skin, resulting in improved skin tone and beauty. Mineral rich sea kelp deeply cleanses and purifies the outer dermis layer by drawing out oils, aiding in skin cell oxygenation and circulation.
