Eastern civilization has always been a place of ancient mysteries and knowledge. This earthy, purifying blend of exotic plant essences is highly regarded for its ability to heal the mind, body and spirit.

Nature's Rx: Indonesian sandalwood has been used traditionally for centuries for skin rejuvenation and in purification rituals. Smoky vertiver reduces skin inflammation, while Neroli increases circulation. Frankincense, revered since ancient times for its healing powers, pairs well with Patchouli, an effective wrinkle inhibitor, beneficial in soothing dry, chapped skin. Now, the *piece de resistance*, a hypnotic breath of Myrrh, known to stimulate the limbic part of the brain, helps overcome stress and depression, while imbibing a sense of inner strength and tranquility .
