Since antiquity, the Sicilian landscape has hosted the cultivation of groves of fruit trees, specializing in producing the sweetest lemons in the Mediterranean. This fruit seems to bear as much importance now, as it did hundreds of years ago as part of the many facets in the Sicilian lifestyle. Our invigorating scent combination has captured the full essence of the lemon tree. The addition of native botanical essences deliver a woody bottom note, to smooth out this rich lemony fragrance.

Nature's Rx: Infused with citrus extracts, this soap improves microcirculation while removing dead skin cells, leaving the skin invigorated and squeaky clean. Their natural anti-oxidants provide a detoxifying vitamin cocktail of C, E, and D, which help the skin manufacture collagen, needed for regeneration of connective tissue. The addition of Italian bergamot, a mainstream in traditional Italian medicine for skin rejuvenation, and cedarwood, prized for its purifying properties that benefit the skin's underlying tissues, help round out this southern European comfort scent.
