The cool invigorating synergy of our nutrient rich botanical combination is complex, yet perfectly balanced. These Mediterranean herbs are nature's valuable treasures, containing enriching plant extracts that are full of extraordinary antioxidizing skin regenerating properties. Rosemary, mint and thyme come together with the addition of mineral rich Aegean green clay, to detoxify your skin, while stimulating its outer dermis layer.

Nature's Rx: Rosemary is an astringent known for its strong anti-bacterial properties, helping rid skin of excess bacteria. Mint stimulates and opens up the skin's pores, therefore increasing thymes effectiveness in oxidizing and ridding the body of the aging effects of toxic fat. Mediterranean aloe, known for its humectant properties will easily permeate the skin to seal in moisture, while leaving it naturally soft and rejuvenated.
