### Mediterranean Sea SPA Mud

Price: \$5.50

get detoxified

Close-up image  
of bar

This soap contains a unique blend of natural thermal Mediterranean mud that is extremely rich in trace minerals, marine extracts and important organic elements. It has both cosmetic and therapeutic benefits that help detoxify the skin while leaving your whole body looking radiant and feeling refreshed. Our synergistic blend of eucalyptus and earthy essential oils is gentle enough for both the face\* and body.

**Nature's Rx:** This rich creamy soap enhances skin renewal by increasing the skin's oxygen level. Its rich mineral components deeply cleanse and purify the skin by drawing out oils, impurities and pollutants from deep within the skin's pores leaving your body feeling soft, silky and totally pampered. Bi-products of the Mediterranean Sea have been revered since ancient times for their restorative and regenerative properties as Nature's Rx for fine skin care.

- When using on your face, lather the bar in your hands first. Gently apply the silky lather to your face in a circular motion, avoiding delicate eye areas or contact with eyes. Rinse well and pat dry. If skin becomes irritated or you feel any discomfort, discontinue use. Always test all soap products on a small area of your inner arm to make sure you are not fragrance sensitive. Recommended for normal to oily skin. Great for adult onset acne.
