This enticing, fragrant blend of naturally, nourishing woods oils and resins, is delivered directly from Mother Nature's exotic woodlands. It starts with a rich sophisticated and resinous combination of South American guaiacum wood, Australian buddahwood, and Himalayan cedarwood. Healing Mediterranean herbal essences add a slightly sweet woody incense note to round off the spiritual aromatherapeutic qualities of this mystical scent.

Nature's Rx: Their medicinal oils are high in saponines, a combination used for centuries by the Indians, as a natural alternative to rid the skin of excess toxins, allowing natural healing and regeneration. Don't be fooled, this powerful blend of precious oils has a sweet, green woody scent and delivers a powerful shot of aromatherapeutic, antidepressing qualities.
